

# Prioritize Gaps to Address

## Virginia Flood Protection Master Plan

### WHAT IS THE VFPMP?

All Virginians face a risk of flooding and benefit from flood resilience efforts. That is why the **Virginia Department of Conservation and Recreation (DCR)** is leading development of the Virginia Flood Protection Master Plan (VFPMP) to proactively reduce flood risks and increase the flood resilience of communities across the Commonwealth. **The VFPMP will serve as an actionable plan Virginia's government can use** to develop policies and programs that reduce current and future flood risks across the state by developing long-term, coordinated strategies and maximizing the benefits of flood resilience efforts.

### PHASE 3: PRIORITIZE GAPS TO ADDRESS

#### Purpose:

Identify and prioritize data, resource, and capacity gaps in statewide flood risk management.

#### During the Prioritize Gaps to Address phase, the Plan Development Team:

Analyzed state agency plans, resources, programs, and policies to identify gaps in flood resilience practices that would prevent flood resilience objectives from being completed

Conducted interviews, in-person workshops, and virtual feedback sessions with community and state agency stakeholders to prioritize identified gaps

Synthesized background research and stakeholder input to develop a list of prioritized gaps to be addressed by the VFPMP
